## *New & Improved Leg Features*

- We design our elevators with assembly in mind saving you time and money
- Customize to fit your specific application
- Over 35 years of combined field and manufacturing experience
- Platforms are built to OSHA specs and provide considerably more room to work and the security of our rigid frame construction
- Ladders match our leg sections and are built with unitized legging
- All equipment is manufactured in the USA with facilities in Pigeon, MI and Chico, CA made by Americans
- All our leg capacities are calculated at water level cup fill, which is 5-10% more conservative than the competition
- Detailed Operation Manual with drawings and documentation to assist you during the installation process
- Manufactured with continuous welded construction, not bolt together or lock formed

## *Ease of Assembly*

- Ease of assembly with welded steel safety cage, modular bolt together platforms, jugged and continuously welded galvanized trunking with hot dipped galvanized connection angles

*Built since 1994*
